CVI and Hyperion Development Announce Strategic Alliance

CVI and Hyperion Development are pleased to announce a strategic alliance to leverage joint engineering and production opportunities for sophisticated optical system designs.

“Hyperion brings unique skills in modeling and optimizing optical designs for complex, tight-tolerance optical assemblies and sub-assemblies,” states Stuart Schoenmann, CEO of CVI. “We believe that a strategic alliance combined with CVI’s engineering and world-wide production strengths will enable both companies to deliver innovative and affordable opto-mechanical assemblies and sub-assemblies.”

Russ Hudyma, Managing Partner of Hyperion Development, believes that “this opportunity to team with CVI will allow us to deliver turnkey solutions from prototype design through to volume manufacture. This agreement marks a significant new way of executing business in the optics industry. We are proud to be the vanguards of change.”

Hyperion Development, a recognized world-leader for intellectual property creation, concept design and design process for manufacture specializes in optical system design, optical analysis, system simulation, and opto-mechanical design.

Hyperion’s clients include major integrators in the semiconductor, aerospace, and defense industries. Hyperion works with leading Fortune 500 companies to design and develop leading edge optical and opto-mechanical systems.

Serving semiconductor, biotech, industrial, commercial, aerospace and research industries, CVI combines 30 years of optics manufacturing expertise with precision machining and mechanical design to produce integrated opto-mechanical assemblies. CVI is a leading manufacturer of optical components, providing engineering, rapid prototype delivery, high volume production, and system integration for challenging optical requirements. Headquartered in Albuquerque, New Mexico, CVI operates manufacturing facilities in New Mexico, California, the British Isles, and South Korea with sales representatives and distributors located worldwide.
