### **CVI announces additions to its beam folding prism line**

CVI announced today that it now offers custom BK7 and fused silica penta prisms from 1/2" to 3" sizes in quantities from 1 to 1,000. Exterior surfaces can be anti-reflection coated, metal coated or left uncoated depending on specific application requirements.

"Penta prisms act as precise 90 degree turning mirrors which are insensitive to and independent of alignment. We have been manufacturing these prisms for years and are excited about announcing this capability to the market," states Emily Kubacki, CVI Optics Product Manager.

Serving semiconductor, biotech, industrial, commercial and research industries, CVI combines 30 years of optics manufacturing expertise with precision machining and mechanical design to produce integrated opto-mechanical assemblies. CVI is a leading manufacturer of optical components, providing engineering, rapid prototype delivery, high volume production, and system integration for challenging optical requirements. Headquartered in Albuquerque, New Mexico, CVI operates manufacturing facilities in New Mexico, California, the British Isles, and Korea with sales representatives and distributors located worldwide.
